Yandex Uzbekistan Coding and Math Contest

Test your knowledge and skills by solving problems from world-class experts in programming and mathematics. Participate in a battle of intellects to showcase your abilities, gain recognition, and win prizes

Register

Who is the competition for

- University students over the age of 18 in Uzbekistan
- Actively practicing IT specialists from Uzbekistan

To participate, you'll need knowledge of modern programming languages, algorithms, statistics, probability theory, mathematical analysis, and linear algebra

How does it work

- The competition is in English
- Two online stages: mathematics and programming. Each stage includes 7–10 problems
- Offline award ceremony with prizes and gifts from Yandex
- Free participation

Tasks prepared by world-class experts

- **Programming:** Tasks developed under the guidance of Andrey Stankevich, the most decorated coach in the history of the International Collegiate Programming Contest (ICPC)
- **Mathematics:** Tasks developed under the guidance of Alexey Tolstikov, director of the legendary Yandex School of Data Analysis

Why participate

Challenge yourself

The contest features algorithmic and mathematical tasks comparable in complexity to those found in international Olympiads and the ICPC. This is a great opportunity to identify the areas and skills where you may need improvement

Get an award and gain recognition

The top 8 participants with the highest scores will be awarded with money prizes, and the remaining participants will receive gifts from Yandex Uzbekistan

Become a part of a community

The contest brings together ambitious students and young professionals who are passionate about programming and mathematics. This is your chance to become a part of a professional community and find like-minded people

Contest stages

The competition consists of two stages. First, participants must solve programming problems, then math problems. To win, you need to successfully complete both stages. Final rankings are determined by the combined scores for both disciplines.

April 2–18	Registration
April 19	Online programming contest with 8–10 algorithmic problems. Time to solve: 6 p.m. to 9 p.m. local time
April 20	Online math contest with 7–10 problems, ranging from ordinary to complex Olympiad-level challenges. Time to solve: 6 p.m. to 9 p.m. local time
April 23	Sending award ceremony invitations to top-scoring participants
April 27	Wrap up and award ceremony at New Uzbekistan University
Before May 1	Publication of the results on the website

Register
